Chennai, Tamil Nadu

Professional Summary

Result-driven Computer Science Engineering undergraduate specializing in **Cybersecurity**, with hands-on experience in **network security, penetration testing, and vulnerability assessment**. Adept at combining technical expertise in **Python, Java, and Kali Linux** with structured frameworks like **Design Thinking** to build secure, scalable, and user-centric digital solutions. A proactive problem-solver with strong analytical skills, eager to contribute to high-impact cybersecurity environments.

Education

B.E. Computer Science & Engineering (Cybersecurity)	2024 – 2028
Sri Sairam Institute of Technology, Chennai	CGPA: 7.92/10.0
Higher Secondary (12th)	2024
Vimala Matric Hr. Sec. School, Trichy	85%
Secondary (10th)	2022
Vimala Matric Hr. Sec. School, Trichy	80%

Skills

Cybersecurity &

Penetration Testing Workflows, Network Security Fundamentals, **Ethical Hacking**: Active & Passive Enumeration, Vulnerability Analysis & Mitigation.

Programming

Python, Java.

Operating Systems

Kali Linux, Linux/Windows Administration, Systems Security Fundamentals.

Methodologies &

Design Thinking (User-Centric Innovation), Iterative Prototyping, **Frameworks**: Structured Technical Problem Solving.

Projects

NETRA – Portable Network Security Device	(In Progress)
Cybersecurity IoT Network Security	2025 – Present

- Architecting a **plug-and-play cybersecurity appliance** that safeguards end-users on public Wi-Fi by functioning as an intermediary between router and host system.
- Deploying **Suricata IDS/IPS** integrated with **iptables firewall rules** for real-time intrusion detection, traffic filtering, and automated threat mitigation.
- Designing an interactive **security dashboard** using **React (frontend)** and **Node.js (backend)** to deliver alerts, visualize suspicious activities, and monitor network health.
- Simulating attack vectors and defense scenarios using **Cisco Packet Tracer** to validate system resilience and optimize threat response.
- Tech Stack**: Raspberry Pi, Suricata, iptables, Linux, React, Node.js, Networking
- GitHub Repository

Certifications

• Cloud Computing (12-Week) – NPTEL, IIT Madras	2026
• Python for Data Science (4-Week) – NPTEL, IIT Madras	2025
• Cybersecurity Essential Practices (1-Month) – Hebesec Technologies	2025
• Design Thinking – A Primer (4-Week) – NPTEL, IIT Madras	2025
• Programming in JAVA (3-Month) – SSI Computer Education	2024

Key Strengths

- Security-First Mindset** – Built a portable IDS/IPS device from scratch, demonstrating practical cybersecurity application.
- Full-Stack Development** – Proficient in React + Node.js for building real-time monitoring dashboards.
- Cloud & Data Acumen** – Certified in Cloud Computing and Data Science by IIT Madras.
- Structured Problem-Solving** – Trained in Design Thinking for human-centric, innovative solution design.
- Continuous Learner** – Multiple certifications demonstrating self-motivation and commitment to upskilling.
